

## Chlorine Dioxide (Low Range)

for Water Quality Testing (481028)

A broad range of concentrations can be measured with the WaterWorks™ Chlorine Dioxide Testing Strip. Accurate results are obtained in under one minute, making the new chlorine dioxide test strip ideal for the paper processing industry. Strips are packaged in either bottles or foil packs labeled with a detailed color chart.

This patented test promises to be a very attractive alternative to wet chemical chlorine dioxide tests for several reasons. A mechanical reader is NOT required; the unique indicator is reactive only to chlorine dioxide; and accurate results are achieved in under one minute. But best of all, this product is safe and easy to use since there are no chemicals to mix, an MSDS is not required, and the indicator is **noncarcinogenic**.

### Specifications:

#### Chlorine Dioxide (Low Range) (481028)

Details	Test Time
Bottle of 50	1 Minute
Detection Levels	
a.) 0, 0.1, 0.2, 0.4, 0.6, 0.8, 1.0, 1.2, 1.4, 1.6, >1.6 ppm (mg/L)	
b.) 0, 0.1, 0.15, 0.2, 0.3, >0.3, >0.4 ppm (mg/L)
